- The first and the only Side by Side model with a monoblock receiver having external hammers.
- In addition to having the hammer safety, the shotgun has also a traditional safety system.
- Thanks to the helically developed hammer and trigger system on the side covers the shotgun has an increased efficiency.

- The first and the only lever-action model manufactured with a mono-block steel receiver.
- The micro trigger group consists of 13 micro parts and has a trigger pull weight of only 2 kgs. It has a hidden improved lock system.
- It has a softened lever action movement thanks to its micro trigger group and mono-block receiver body structure.
- The combo picattiny rear sight system fixed on the barrel enhances accuracy.
